Alpaca 7B

1-click deployment by BonzAI

Alpaca is a language model fine-tuned from Meta's LLaMA 7B model on 52K instruction-following demonstrations generated from OpenAI's text-davinci-003. It shows similar or better performance than OpenAI's text-davinci-003 on a diverse set of user-oriented instructions.

Powered by 21M BONZAI utility tokens, **14M circulating.**

- Model Local/Remote Deployment Fee
- Model Local/Remote Fine-Tuning Fee
- Computation & Oracle Fee
- Remote Deployment API Credits & Model Tokens
- Staking Rewards & Revenue Share
- Governance of BonzAI proposals

Open Source Artificial Intelligence is booming.

\$1.5 Trillion in value creation by 2035.—*Mandala Research, Stability*

\$50 Billion global investment in OS AI to date.—*Stanford HAI, Goldman Sachs*

\$250 Million investment in OS AI **model deployment & serving**.—*CB Insight*

The model deployment and serving category of Artificial Intelligence products bridges the gap between Data Science and DevOps by streamlining the deployment of trained models to production.

Q2 2024 — BonzAI Desktop dApp v0.1 — Local Deployments

Our v0.1 release marks the beginning of the local Artificial Intelligence (AI) revolution.

Q3 2024 — BonzAI Bittensor Orchestrator

BonzAI works with Bittensor subnet operators and validators on automating their node DevSecOps.

Q4 2024 — BonzAI Desktop dApp v0.2 — Remote Deployments

1-click deployment of your AI API to Amazon AWS, Microsoft Azure, Google GCP and self-hosted servers.

Q4 2024 — Personal Artificial Intelligence

BonzAI allows the fine-tuning of your own LLM AI chatbot using personal data, in 1-click.

2025+ — BonzAI Desktop dApp v1 — Models Galore

Generative Art without limit. Directing Movies from Home. Any Song. Any Lyrics. Any Beat. Any Voice.

2025+ — BonzAI Desktop dApp v2 — Models Hybridation

Combine local and remote BonzAI models to achieve next-generation, multimedia outputs.
